

Exercise 1: Requirements Definition (Exercise Description)

For the *breakout exercises*, you'll be in multidisciplinary teams.

- Make sure you know who knows what.

Identify on your team:

- A scribe
- A timekeeper
- A presenter
- A decision-maker
 - Important: *"Debate which questions to ask, not the answers."*

Instructors will visit every team. Use them:

- Just as instructors and mentors
- "In role" as Case Study expert users

Remember this about the exercise presentations that you will prepare:

- There will be a presentation and discussion.
- You will probably use 3 - 4 working flip chart sheets or screenshots per team.
- We'll call on one or more teams each session.
- We'll discuss a "model answer" at the end.

Some tricks of the trade for the breakout exercises (1 of 2)

For the *breakout exercises*, you'll be in multidisciplinary teams.

- Make sure you know who knows what.

Identify on your team:

- A scribe
- A timekeeper
- A presenter
- A decision-maker

Hint: Make the scribe and the presenter the same person.

Hint: Change for each exercise.

Hint: Whatever the question, "heads" is "YES."

- Important: *"Debate which questions to ask, not the answers."*

Instructors will visit every team. Use them:

- Just as instructors and mentors
- "In role" as Case Study expert users

Hint: If they go missing, find them.

Remember this about the exercise presentations that you will prepare:

- There will be a presentation and discussion.
- You will probably use 3 - 4 working flip chart sheets or screenshots per team.
- We'll call on one or more teams each session.
- We'll discuss a "model answer" at the end.

Hint: You will not know if it's you until the end of the exercise.

Case study Exercise 1: Requirements Definition

At the end of this exercise, you will need to be ready with the following:

- A System Context Diagram:
 - Remember to include both human and system actors
- A high-level Use Case Model (a “bubble diagram”)
 - Do not include Use Cases themselves
- List of key qualities (non-functional requirements) that the solution needs to satisfy

THANK YOU
