

Exercise 5: Logical & Physical Operational Models (Exercise Description)

Exercise 5: Logical and Physical Operational Models

During this exercise we want you to create a complete *Logical Operational Model* and (unsized) *Physical Operational Model* views.

LOM: Go through the following steps:

- Use the *Location* and *Deployment Unit* Models from the results of your previous exercise
- Place *Actors* and *Logical Nodes* within the Location Model together with their connections (i.e., access and integration mechanisms)
- Create a complete LOM by placing Deployment Units within the nodes

POM: Go through the following steps:

- Based on the LOM you have completed, create the Physical Operational Model (POM)
- Consider how key NFRs will affect translation of Logical Nodes into Physical Nodes
- What additional technologies and Physical Nodes will be required to satisfy the key NFRs

Be ready with:

- A complete Logical Operational Model
- A complete (unsized) Physical Operational Model

THANK YOU
